

① LEA means Language Experience Approach which is a literacy development method that has is early reading development with first language learners.

Offset within an array or other data structure object is an integer indicating the distance between the beginning of the object and a given element or point with the same object.

② Data Segment: Data segment is a portion of an object file or address space of a program that contains initialized static variables

$\boxed{p. 100}$

Data: Data is information that has been translated into a form that supports efficient movement or processing.

- Data is represented by for Data segment.

③ DS Data is basically which points at the segment where variables are defined. Which is called Data Segment.

And, CS is generally points at the segment containing the current program.

4. Memory accessing Registers are:

① CS,

② DS

③ ES and

④ SS

— Those all are memory accessing Registers.
